CONFIDENTIAL — For Institutional Review Only

AWS Certified Cloud Infrastructure (Founder background)	TCS — 4 Years Enterprise IT Experience	Zero Setup Browser-Based Tools Only	Hands-On Format Live Demonstrations
--	--	---	---

Note: RupeeValcore's NISM Series XII certification relates to securities markets and applies to our Financial Literacy programme only. It is not presented as an AI credential.

01 PROGRAMME OVERVIEW

The AI Orientation Programme is a single, structured 3-hour session that introduces school students to what AI is, how it is already part of their daily life, and how to use it safely and responsibly. NEP 2020 encourages coding, computational thinking, and future-ready digital literacy — this session gives students a first, guided exposure to AI tools in a classroom-safe setting.

This is a one-time orientation, not a term programme, club, or annual curriculum. Schools that wish to continue AI learning beyond this session may discuss a separate, custom-scoped follow-on engagement with RupeeValcore Technologies at a later date.

02 WHAT THIS SESSION COVERS

Segment	What Students Learn	Format
AI Awareness	What AI is, where students already encounter it (search, recommendations, study apps), and its everyday uses.	Guided discussion + live demo
Safe & Responsible Use	How to use AI tools safely, why AI answers must be checked, and academic integrity when using AI for schoolwork.	Guided discussion + examples
Live Demonstration	A supervised, teacher-guided demonstration of one or two beginner AI tools appropriate to the age group.	Live, trainer-led
Reflection & Q&A;	Open discussion on what students learned and how to use AI responsibly going forward.	Facilitated discussion

03 AGE-APPROPRIATE DELIVERY

Content and depth are adjusted by grade band. The same session is not delivered identically across all ages.

Grade Band	Focus
Grades 6–8	AI Awareness and Safety — what AI is, simple safe-use habits, recognising AI-generated content.
Grades 9–12	AI Productivity and Future Careers — using AI tools responsibly for study and project work, career-readiness context, academic integrity.

Grades below 6 are not part of this programme in its current form. A separate, developmentally appropriate design would be required for younger students.

04 AI SAFETY, RESPONSIBLE USE & DIGITAL CITIZENSHIP

This section is a core, non-optional part of every orientation session.

Topic	What Is Taught
AI Safety	Students learn that AI tools can make mistakes, and are shown examples of AI giving an incorrect or made-up answer, so they learn not to trust AI output blindly.
Responsible AI Usage	Guidance on appropriate use of AI for schoolwork versus misuse (e.g. submitting AI-written work as one's own).
Digital Citizenship	Basic etiquette and safety when interacting with any online or AI-based tool, including not sharing personal information with AI chatbots.
Verifying AI Output	A simple, repeatable habit: check AI answers against a textbook, teacher, or trusted source before relying on them.
Academic Integrity	Clear guidance that AI can support learning and research, but schoolwork submitted for grades must reflect the student's own understanding, in line with the school's academic integrity policy.

05 PRICING

All fees are exclusive of GST. GST applicable as per prevailing rates. Final fee confirmed after a discovery call to understand grade levels and cohort size.

Format	Scope	Duration	Fee (+ GST)
AI Orientation Programme	One grade band, single batch	3 hours	Rs.15,000 – Rs.25,000 + GST
AI Orientation — Full School	Multiple grade bands, same day	Up to 6 hours	Rs.20,000 – Rs.35,000 + GST
Per-Student Rate	Co-pay / opt-in cohorts	3-hour session	Rs.299 – Rs.599 + GST

Subsidised pricing is available for government and aided schools. This is a one-time orientation fee — it does not imply or include a recurring or annual commitment.

06

TRAINER BACKGROUND

Manikandan C — Founder, RupeeValcore Technologies

Manikandan C brings 4 years of industry experience at Tata Consultancy Services (TCS) and holds an AWS Certification in cloud infrastructure. He holds a B.E. in Medical Electronics Engineering. He has practical, hands-on experience with AI tools through building RupeeValcore's own technology systems.

RupeeValcore also holds the NISM Series XII certification (SEBI-backed) and delivers a separate Financial Literacy programme. This certification is specific to securities markets and is not presented as an AI-related credential. It is disclosed here for transparency only.

07

DATA PRIVACY

RupeeValcore Technologies does not collect or store any student personal data during this programme. Where the session includes a live demonstration of a third-party AI tool, that tool operates under its own privacy policy and terms of service, which are independent of RupeeValcore. Schools and parents are encouraged to review the relevant third-party tool's terms before independent student use.

08

NEXT STEPS

1

Discovery Call

A free 20-minute call with Manikandan C to understand grade levels, cohort size, and scheduling. Zero commitment required.

2

Session Confirmation

RupeeValcore Technologies confirms the 3-hour orientation date, grade band(s), and venue logistics with the school.

3

One-Time Delivery

The 3-hour AI Orientation Programme is delivered on the agreed date. No further sessions are scheduled unless the school separately requests a follow-on engagement.
