Objective

Risk and control–focused professional with 3+ years of experience at Tata Consultancy Services, working in highly controlled, audit-driven technology environments. Strong exposure to access governance, incident and change management, operational controls, and documentation standards. Possess solid finance fundamentals across mutual funds, bonds, taxation basics, insurance, ULIP concepts, and asset servicing workflows. Well suited for Risk & Control Operations and Technology Risk roles within a global custody and asset servicing organization.

Experience

- Tata Consultancy Services (TCS)** 24/03/2022 - Present
Technology Operations & Governance Engineer
Executed cloud infrastructure operations within governed production environments, ensuring stability, accuracy, and compliance with defined controls
Applied strict access governance and approval controls, validating role-based permissions and segregation of duties across platforms
Performed backup monitoring, restore validation, and patch governance activities to ensure system integrity and business continuity
Conducted operational health checks, post-change validations, and controlled execution of production activities to minimize operational and technology risk
Investigated incidents, performed root cause analysis, and ensured corrective actions were tracked and documented through ITIL-aligned processes
Maintained audit-ready documentation, evidence records, and operational logs to support internal reviews and compliance requirements
Coordinated with cross-functional teams to ensure escalation protocols, approvals, and control requirements were consistently followed
Technology Scope
AWS: EC2, S3, IAM, backup validation, migration verification
Microsoft Azure: Virtual Machines, Entra ID (IAM), Azure Backup, Azure Monitor
Processes: Incident, Change, and Problem Management (ITIL)

Financial Skill

• RISK & CONTROL OPERATIONS EXPOSURE

Strong understanding of operational risk and control frameworks, including maker–checker controls, approval hierarchies, and escalation mechanisms
Experience supporting control execution and monitoring to ensure defined procedures were followed without deviation
Familiarity with incident risk review, root cause documentation, and remediation tracking
Exposure to audit interaction support, including evidence preparation and control validation
Risk-aware mindset aligned to protecting business processes, client deliverables, and regulatory expectation.

FINANCE & ASSET SERVICING FUNDAMENTALS

Strong foundation in personal finance fundamentals including budgeting, saving, compounding, and long-term planning
Solid understanding of mutual funds: equity, debt, hybrid funds, SIPs, expense ratios, and NAV drivers
Knowledge of bond basics: government vs corporate bonds, coupon, yield, maturity, and interest-rate sensitivity
Understanding of taxation basics, including income tax structure and capital gains (equity and debt)
Familiarity with insurance concepts, including term insurance, health insurance, and risk protection versus investment products
Understanding of ULIP structures, cost components, lock-in periods, and comparison with mutual funds
Conceptual understanding of custody and asset servicing operations, including trade lifecycle, settlements, and position handling
Familiarity with corporate actions such as dividends, bonus issues, and stock splits, and their operational impact
Working knowledge of financial statements, including P&L and Balance Sheet, and income versus expense classification

Key Skills

- Risk & Control Awareness
Audit & Compliance Documentation
Incident Review & Root Cause Analysis
Access & Change Governance
Control-Driven Process Execution
Technology
Cloud Operations (AWS & Azure)
Identity & Access Management (IAM / Entra ID)
Backup Validation & Patch Governance
ITIL-Aligned Operations

Education

- **Sengunthar College of Engineering**
Bachelor of Engineering – Medical Electronics
74%
- **Dharam Hinduja**
Higher Secondary (Class XII)
66%

Acievements& Initiatives

- Designed and delivered internal personal finance awareness sessions covering budgeting, saving, mutual funds, SIPs, compounding, and basic stock market concepts
Conducted structured seminars on “Finance for Everyone”, focused on building financial literacy for beginners with no prior finance background
Simplified complex financial concepts into practical, easy-to-understand frameworks to improve financial awareness and decision-making
Recognized for clear communication and ability to explain regulated financial concepts accurately and responsibly

Tools

- ServiceNow
- JIRA
- MS Excel (VLOOKUP, XLOOKUP, Pivot Tables)
- SAP – basic exposure
